**COOLER DESIGN, INC.**

4th Quarter 2010

## PROJECT UPDATE

**Bloomington Hospital, IP Hospice** is a facility designed for terminally-ill patients during the later stages of life. Just under 11,200 square feet in size the building will provide eight patient bedrooms with shell space for an additional four bedrooms in the future.

Nestled within a wood-like setting, this facility was designed with Craftsman-inspired features, both inside and out. Hospice staff desired a facility that would make patients and families feel at home.

IP Hospice is pursuing **LEED** certification, encompassing environmentally-friendly building design and construction practices.

## INTRODUCING OUR YOUTH TO ARCHITECTURE AND DESIGN

On October 21<sup>st</sup>, **Great Start** hosted an event centered around children and the field of design.

**Cooler Design** was on hand to help provide children, ages 8-12, with insight into their future careers and learning about design.

## MAJOR ANNOUNCEMENTS

Cooler Design's 5<sup>th</sup> anniversary occurred on May 9<sup>th</sup>, 2010. Bill and the rest of the CDI team look forward to many more years of successful projects.

Congrats to **Scott Duell** for having committed 5 years to the CDI team!

Maegen and Austin Fleck celebrated the birth of **James Reid Fleck** on August 4<sup>th</sup>, 2010. 'Reid', born 7 lbs and 20-3/4", is now working on crawling & designing his first building!

## NEW EMPLOYEES

We are pleased to welcome **Toni Grimes**, Project Architect, **Chuck Knapp**, Project Architect, and **Brianna Wetzel**, Architectural Intern, to our design team.

Toni Grimes is a LEED accredited professional and has served as studio leader and development coach at prior firms. She holds a masters degree from Clemson University where she also conducted her undergraduate studies.

Chuck Knapp brings over 30 years of project experience to CDI. He has been involved in all phases of design and development and has worked on hospitals, surgical centers, laboratories and healthcare clinic projects.

Brianna Wetzel earned her undergrad degree in architecture at Ball State University. In May of 2010, she completed her Masters Degree. She has performed work in various phases of design and enjoys 3D modeling and rendering.
